O R D E R -

The Special Malaria Officer has reported that the Roya Channel and its branches in the Hospet Municipality are thickly overgrown with weeds and grass, offering ideal conditions for the breeding of mosquitoes; and that the high incidence of malaria in the municipality is due to the condition of these channels. He has accordingly suggested that the banks of the channels should be cleaned of all weeds and grass and that the sides of the channels should be sloped. The Director of Public Health has submitted in consultation with the Executive Engineer, Bellary, an estimate amounting Rs.1,860 to meet the cost of these works. The Government sanction the above expenditure.
